

YOUNG MINDS

Issue No. 18, November - March 2017

For Private Circulation only.

FROM THE CHIEF EXECUTIVE PRINCIPAL'S DESK

Dear Parents,

As we come to the end of another incredible academic year at Indira National School, our minds and hearts are filled to the brim with joy and happiness. The school began its journey in 2005 with just 10 students. As this year draws to a close, 3 of those 10 students will be appearing for their Boards from INS. We have indeed come a long way. We are indebted to you all, our well wishers, for your unstinted support and encouragement. A huge thank you to all the INS Staff and students as you make coming to work such a pleasure. It is the students who translate our dreams into reality and they always exceed our expectations. Their commitment and dedication will lead them to excel, and assures us that they will be the leaders of tomorrow.

I am proud to share with you the fact that INS is the 3rd school in India to have adopted "Leader In Me" program of Franklin Covey. (Link <http://franklincoveysouthasia.com/tlim/>) You can look forward to your children benefitting from this highly successful program in the next two years.

'Young Minds' and the INS Facebook page provide you a glimpse of all the accolades and achievements of the students. New benchmarks are achieved each year, for we strive to compete against ourselves every year.

Teamwork is the hallmark of INS. Through collaborative effort we can achieve more to benefit our students who are the future leaders of the country.

A supportive management, caring and dedicated teachers, and most importantly committed and co-operative parents who believe in, and have faith in the school will go a long way in making the school a harmonious hub of creative and disciplined students.

Let me sign off with warm and sincere regards.

GEETA PILLAI

Chief Executive Principal

THE EDITOR'S NOTE

Another dynamic and soulful year at Indira National School has sped away leaving its ineffaceable impressions on our minds, and here I am, the editor, summing up the highlights of this session for all to read. This year was surely as eventful as any other at our esteemed school, witnessing a plethora of activities, emotions, lessons and experiences. However, it is possible to assimilate only a part of them in this edition of the newsletter.

As you flip through the pages , you are bound to experience the vast imaginative powers possessed by our dear children. The young minds , 'with their thinking caps on' , exude an exuberance just like a butterfly that flies out of its cocoon and discovers the world. They have undoubtedly presented a mixed bag of goodies , entirely precious and to be always treasured.

While compiling the contributions in the form of articles , stories , games , puzzles and the masterstrokes in the paintings, I was filled with a sense of pride that these young souls are surely riding on the wings of vision , under an azure sky gleaming with the rising Sun and the future awaits their coming with open arms. I would like to add here that our dear parents should rest assured that their children will without fail learn to handle their lives well just like the baby turtles learn to face the turbulence of the ebbing tides that come their way.

Through this edition of the newsletter, I wish to fuel enthusiasm into the students and hence urge them to contribute efficiently towards the triumphant colours that Indira National School has painted itself into, during the coming session as well.

I take this opportunity to wish a very bright and successful future to the outgoing batches of standards 10th and 12th. I would also like to thank everyone who has contributed in making this edition of the newsletter possible.

Last but not the least, I would like to present this quote which rightly sums up my emotions and thoughts:

*"Every child is a different kind of flower....
And together they make this world a beautiful garden."*

MEDHA GULATI
Editor

ART MANIA

With immense pride , I would like to share with you the details of the vibrant ' Art Mania'(held on 22nd October , 2016) , an amalgamation of art and craft displays , woven together by the young hands of IVth, Vth and VIth standard students. The vast array of products that were displayed included the use of various techniques such as quilling , origami , clay moulding , best out of waste and painting techniques. Each class was divided into six groups comprising of 6-7 students. Based on their interest and the acquired skills , they were provided with the raw material and under the able guidance of their teachers , ' masterpieces' were created. The beautiful products such as bookmarks , key rings , decorative diyas , flower vases , earrings , lanterns , paintings , paper plate crafts etc adorned the classrooms and the corridor of the school. The skillful display of these colourful products surely added to the festive fervour . The money collected from the sale of the selected products was donated for a social cause.

The experience of conceptualizing , planning ,executing and showcasing of the exhibits definitely added to the learning of the students. The importance of team effort and hardwork were undoubtedly the highlights of 'Art Mania'.

HEALTH AND WELLNESS AND DEBATE CLUBS (Class 6)

ECO CLUB :

Grade 8 teachers and students took initiative for cleanliness drive.

SST 3D MODEL MAKING : CCA - CLASS 7

Grade 6 to 10 students took part in various competitions organised by ' GIIS' School Chinchwad Pune and made INS proud by securing first position in various competitions.

1. Master Chef Special Fireless Cooking Grade 7 & 8 group secured 1st position.
2. Solo Singing - Prateek Sridhar from Grade 8 Omega secured 1st position.
3. Classical Group Song Grade 6 to 9 students took part and secured 1st position.
4. Decoupage pot painting - Grade 6 to 8 students took part and secured 1st position.
5. Wall Art - Grade 6 to 8 students took part and secured 1st position.
6. Rubik's cube - Harsh Lad from Grade 10 secured 2nd position.
7. Greeting Card Making - Dyuti Varma and Shreya Hande from Grade 6 secured 2nd position.
8. Canvas Painting - Arnav Kesarkar from grade 7 secured 3rd position.

GOLDEN FRIDAY

Being the kid of a teacher, after 1:30 pm the next hour would be spent idling around, wandering aimlessly until we went home. This was a mundane routine which turned out to be unproductive and boring.

Thanks to Bijal ma'am, our student counselor Fridays turned out to be an exception. She kept us engaged for an hour via an activity 'Golden Friday'. We spent this hour with some kids of the primary section and helped them in their academics and this proved beneficial for all of us.

Through games and fun activities the children made academic progress and we learnt to be patient and good listeners. As a result we have developed a better relationship with our siblings.

Palak Juneja, Riya Munje, Sanika Bhangaonkar , Nisamya Sringarapu, Samreen Mukherjee, Anish Thorat, Steve Mathew.

ANNUAL SPORTS FIESTA

Indira National School celebrated its annual sports extravaganza on 14th October 2016 for the secondary and senior secondary section(VII - XII) and on the 30th November 2016 for the primary section (I,II and III) at balewadi stadium.

The stadium was full of excitement and zeal and the beautiful decorations complemented the atmosphere. The objective was to impart a sense of discipline, fellowship and sportsmanship and provide an outlet to channelize the students energy and stimulate their mind.

Not only did more than a thousand students participated in the sports fiesta, but the parent turn out was also equally impressive.

The primary students participated in various displays and drills which made the event highly engrossing. Yoga, Taekwondo displays were the highlights of the occasion.

Our dignitaries, parents chief guests Ms Anjali Bhagwat-first Indian shooter to win gold in the World Cup finals at Milan and Mrs. Arnika Gujarji- former national level basket ball player were left spell bound by the sensational performances of the students.

WINNERS

SCOPE

SAHODAYA SCIENCE EXHIBITION

A school science exhibition is a great way to experience science first-hand. The one day Sahodaya Science Exhibition with the theme 'Smart cities for sustainable development with Gross National Happiness' for group I (classes 9 to 12) and 'Be the light of life' for group II (classes 6 to 8) was successfully hosted by Indira National

School on 26th November, 2016. The objective of Smart Cities Mission given for Group I was to promote cities that provide core infrastructure and give a decent quality of life to its citizens, a clean and sustainable environment and application of 'Smart solutions'. While the Group II students were asked to make models, projects related to light as one cannot deny the importance of light in our life. The event saw young enthusiastic participants from different schools under Sahodaya putting up various exhibits comprising of innovative working models and investigation based projects.

Dr. Rama Mishra, an associate Prof. IISER inaugurated the programme. Dr. Rama Mishra addressed the students and advised them to focus on their potentials. She said that science is the need of the hour and students should focus on science. She applauded the students for their novel ideas and the teachers who helped them with their models.

Mrs. Mrinmayee Bhave, President - Sahodaya School Complex, Pune spoke about the importance of Sahodaya and said that such exhibitions are a small step in collaborative work. She appreciated the efforts taken by Indira National School to successfully host the Sahodaya Science Exhibition. Mrs. Bhave wished the students loads of scientific, artful and skillful thinking. Mrs. Arunima Mazumdar, Deputy director - CBSE Centre of Excellence, Pune was the guest of honour for the event. Referring to the work of the Science exhibition, Mrs. Mazumdar spoke about how the students are the best ambassadors of the wonderful ideas, to take it to the authorities to implement it for the future, and such innovative ideas must be publicized and not be confined to the school. Mrs. Geeta Pillai, Chief Executive Principal of INS felicitated the dignitaries.

The exhibits by the different schools across Pune were indeed an eye opener. In Group I there were 23 schools, while in Group II 24 schools had participated in the exhibition. With an endeavor to promote scientific attitude among budding young students, this exhibition was one of its kind. Mrs. Arunima Mazumdar presented the certificates to all the participants. Indeed the exhibition was a huge success, and proved to be a great learning experience for the students.

THE LEADER IN ME

Indira National School firmly believes that the school should not only emphasize on academics, but also inculcate ethics and leadership qualities in its staff and students. The 21st employers expect technical skills and a strong foundation of interpersonal skills of their recruits, for the successful operations of their firms. To prepare our students to be global citizens, what better way than launching The 'Seven habit workshop, by Franklin Covey for its stakeholders?

The seven habit workshop for educators has already been launched, and the teachers and staff are positive that there'll be a 'paradigm shift' amongst them. The teachers have already learnt to maximize their organizational and prioritization skills and to pay attention to things that are most important. As a result not only have they turned into better teachers but also better individuals.

Students will participate in the Franklin Covey workshop- custom made for them-in the ensuing academic year. The fundamentals and the importance of the seven habits will be discussed with them, and broken down into 'doable' activities and concepts. Students will be given ample opportunities to practice life skills in school, and eventually it'll become a way of life with them.

I am sure parents will be proud of their self-disciplined, self-reliant and self-confident children, as teachers help inculcate the traits, and improve upon the students' self-esteem.

INTEGRATED APPROACH TO LEARNING

Life does not come in compartments hence learning should also be integrated. With this objective, the students undertook the social responsibility of monitoring and assisting the day to day running of the school for a day by engaging in Gate duty, conducting the assemblies in the class, conducting a washroom audit, Class room cleanliness audit and assisting in primary classes with the main teacher for academic and co scholastic support. The project was research based and was implemented with a data collection and analysis objective to hone the reasoning and problem solving skills.

Moving away from moralizing, the school decided to use the deductive method to sensitize the senior students towards issues of discipline, by reporting to school on time, classroom and washroom cleanliness and imperative lessons in patience and perseverance as they assisted younger students during the classroom support develop leadership and problem solving skills through a research and data based project within the given time frame of one academic day in school. The class was divided based on the various duties defined in the social leadership project. Students were assigned Gate duty to monitor and encourage on time arrival through dialogue and deliberation and also collect data to analyse which segment of the school has more number of late comers and possible reason to it. Another set of students audited the washroom when they came in the morning on prescribed parameters and after one hour to analyze the state of toilets in the school and how to maintain hygiene as they were public utilities for which no one individual could be held responsible. Students also conducted classroom assemblies in all the classes of the secondary segment and they came prepared with news, thought, and a brief talk.

The objective was to take responsibility, hone their public speaking skills and confidence beyond the walls of their own classroom walls. All the students of the assigned class also assisted the primary teachers for more than an hour in their classrooms, helping the students with differentiated needs to complete their work, prepare classroom teaching aids, assist in co scholastic activities like art, music and sports. The classroom assistance was with the objective to initiate senior students into leadership roles and also inculcate patience while handling younger students.

All data and assessments were collated together by students during the second half to come up with an integrated report which was purely data wise and not based on assumptions. The need to maintain hygiene, interpersonal skills, report writing based on reasoning as opposed to assumptions, as students had to collate data from different sources and plotting the data on graphs and pie chart helped students integrate their learnings from all scholastic subject and make practical use of the same while they took charge as 'class on duty' on that day. Class teacher and other teachers continuously helped and supported the students during the day to take up the responsibility. Students who were not confident of taking up the leadership roles were encouraged and teachers accompanied them to ensure 100% participation.

THE POOR OLD MAN

Once upon a time, in a small village, there lived a poor old man. He had no money and never enough to eat. So one day he went to his neighbour for some money. His neighbour was very rich. His neighbour refused to give him any money. So, he went back home without any money. While sleeping at night, he thought of a plan. In the morning the poor man went to his neighbour's house and asked for some water. As soon as his neighbour went to fetch water, the poor man took some of his money and went home. After some time, the rich neighbour realized that some of his money was missing but he couldn't do anything as he was not sure who had taken his money. He only felt sad. At night, old man was not feeling good after stealing and came to his neighbour's house. The rich man was sleeping, but old man put all his money back at his bedside. When rich man woke up in the morning, he saw all his money back and was very happy.

Next day old man went to the market to buy some bread. When he opened his wallet, he saw it was filled with money. He couldn't understand but bought some bread and even a lollipop for his son. When he opened the wallet to see how much money is left, again it was filled with money. It happened everyday and the old man became rich. Do you know why it happened? Because God saw his honesty and gave him this gift.

Moral of the Story: Always be honest.

ADITI AGARWAL, 2nd Sigma

A SCIENTIST

*Wacky serums, Blood blends
Their minds have no dead ends
Always making great differences
By calculating circumferences
A scientist is a mastermind
And solutions are what they find
With their tools all laid
Their intelligence does not fade*

*They are descendants of wizards
Who experiment on lizards
Though some of them fail
And few make it hail
A scientist is a mastermind
And solutions are what they find
They sometimes make a revolution
Which is no illusion*

AYUSH KUMAR, VI Alpha

FRIENDS FOREVER

Friendship is an important part of life and having strong relationship with people will always keep you happy. Best friends will be with you to share good times and stand by you to help you overcome the hard ones. They are sincere and make incredible sacrifice. Friendship is about having wonderful moments with friends and sticking to them no matter what you do or what goes on. There are friends we hang out with, shop with, head to the movies with or share our interests with. But despite having a pal for every occasion, having a best friend is a huge bonus life. You get to share thoughts, dreams, fun time and problems with someone who knows, understands and cares about you.

Making friends is one thing, but marinating good friendship is a matter of great importance and commitment. Your friends are your guide in life as well as the people who help define who you are. Friendship is a very delicate and sensitive relationship. It is like planting a seed and nurturing it, to see it blossom. Vices like arrogance and vanity are harmful to friendship.

Remember, when you respect your friends and treat them as you would like to be treated, you will always be rewarded with a trustworthy everlasting companionship

THE TWO NAUGHTY BOYS AND THE BRAVE ONE

Once upon a time there lived two boys. Their names were Rahul and Ricky. Rahul and Ricky would always be up to some mischief .The teacher was tired of scolding them. Rahul would always steal other student's things and Ricky would keep teasing everyone.

One day during lunch break, Rahul and Ricky went roaming outside the class. They stumbled on a boy which made them angry and they punched the boy. The boy went crying to his class.

On the next day, the boy who was punched went to Rahul and Ricky's class. He complained to Rahul and Ricky's class teacher and told all that had happened, the earlier day . Rahul and Ricky refused to accept his story and denied punching the boy. So, the teacher was confused about who was telling the truth . But then the teacher had an idea and went to the Principal's room . The CCTV camera clearly showed that Rahul and Ricky were lying. This made the teacher angry and Rahul and Ricky were rusticated for two weeks.

Moral: Honesty is the best policy and always stand up for yourself.....

LITERARY

SCHOOL

*Oh yeah! My school
It is cool, it is real fun, and it even has a pool.
It is named TNS,
It gives me education takes my interest.
The teachers are great, they lead me straight.
The sports are fun, as they are a ton to learn.
The teachers are strict, for every little trick.
But it's just great, cause my school is the best.*

MY ARCHAEOLOGICAL ENDEAVOUR - HAMPI

This Diwali holidays we went to Hampi(UNESCO Heritage Site) which is located in Karnataka. We started our journey at six in the morning on 31st October 2016. We went viaSatara, Kolhapur, Belagavi, Hubali and finally reached Hampi. It is situated in Hospet taluk of Bellary district in Karnataka. One can see a fine blend of human and natural physical landscape going hand in hand at Hampi. Its visual expression attracts people from far flung places. This region speaks volumes of history in the past

Hampi is believed to be the ancient 'Kishkinda' of Ramayana times where the monkey kingdom existed. The area was ruled by the Chalukyas of Badami (5-6th century AD), the Rashtrakutas (7-8th century AD) , the Chalukyas of Kalyana (9-11 century AD), Hosyalas (11-13th century AD) and Yadavas of Devagiri (13th century AD). The Sangama brothers Harihara and Bukka carved a kingdom of their own between 1336-1342 AD and founded the splendid city of Vijayanagara with Hampi as the capital.Numerous kings belonging to Sangama ,Saluva and Tuluva ruled Vijayanagara for more than two and a quarter century till its dramatic fall and destruction in 1565 AD. The battle at Rakkasa-Tangadi(Talikota) spelt disaster to the city and empire.

Krishnadevaraya and Achyutaraya were the most celebrated rulers of this empire. By the end of 13th Century, the Islamic invasion seriously affected south India. Out of the various temples we saw the most sacred living temple, Virupaksha temple. The main sanctum houses Shivalinga known as Virupaksha, is the tutelary deity of the Vijayanagara kings. The most outstanding vestige is the ceiling paintings of Vijayanagara in the Rangamandapa. Everyday pujas are performed thrice with naivedyam.

Vitthala temple is another one of the most important temples found at Hampi, as it marks the highest workmanship indicating the mature Vijayanagara phase of architecture. It has a massive enclosure with entrance gateways on three sides with lofty Gopuras at North, South and East. The Vitthala temple is known as Vithaleshwara in the inscriptions. The main temple was dedicated to Vishnu as Vitthala. The temple faces east. The Sandhara temple has Garbhagriha and the other axial mandapas form a long and low structural group and comprises the open mahamandapa.

The Garuda shrine at front is fashioned in the form of a chariot with meticulous decorations with four wheels. It houses an image of Garuda, the vahana of Vishnu. The chariot is a prototype model of wooden ratha. The brick superstructure was originally found over the chariot, which is now missing due to vagaries of time.

The huge monolithic sculpture of Lakshmi Narsimha is located near Krishna temple .It consists of 6.70 m magnificent sculpture.A typical aspect of Hampi is its mountains ,which are made up of huge boulders. There are many theories for the presence of these boulders .Scientist believe that these were formed due to cooling of magma erupted when a huge meteorite fell on this part of the Earth. Mythological theory says that they were formed due to a battle between Vali and Sugreeva which was so intense that they got piled up here in Hampi .Later they were used to build a bridge to Lanka .

Hampi was an experience that the pupil of the eye has never seen a place like this and ear of intelligence has never been informed that there existed anything to equal it in the world .It was truly a beautiful archeological endeavour for me and my family.

MANVEER SINGH, IV Delta

WORKS

THE TWO SISTERS

Once upon a time, lived two beautiful sisters. They both had some special ability in them. The elder sister could turn anything into gold .The younger could turn anything into silver. Their parents warned them not to misuse their powers. One day they had a fight. They used their powers on each other. The elder sister became silver. The younger sister turned to gold. They were trapped in different places. The elder in wonderland, the younger sister in a wild jungle .This story was written in a diary, and Sofia and Celeria were reading it. They were best friends .They closed the book. They wanted to help them. So, they read the last line, it said, "Many people tried to help them but no one could find them". They again closed the book, while they closed it, they saw the back cover open. They saw a map inside it . They wanted to save the elder sister first .They said "Abracadabra". So, they finally reached wonderland . There they saw many different and ugly creatures .They opened the map of wonderland. It said they had to follow the purple flowers .They followed it .They soon reached a cave. A big ship was stuck there. On top they found the elder sister they used a rope and got her down .They took her and went home. They hid her in their closet. They said "Abracadabra" .They reached the wild jungle. They went on ,suddenly got attacked by a huge tiger. They ran, ran and ran they hid in a nearby cave. The tiger stopped and went away . They looked, around and found a tree. On the tree was hanging the young sister .They climbed the tree and got her down. They went home and got the elder sister . They made the elder sister and the young sister promise that they would not fight again. They made them return home. They lived happily ever after.

THE MAGIC TORCH

*The magic torch is magical
And can be very mythical.
If you want anything,
Just say Giving! Giving! Giving!*

*It can give you an idea
Of the best criteria.
I just made the torch swirl,
And got anything in the world!
Just say Giving! Giving! Giving!*

*Be a fairy, be a hero,
But just don't be a zero!
You can be anything, Just say giving! Giving! Giving!*

MY TAKE AWAY FROM THE MOVIE "DANGAL"

Dangal - A movie about a wrestler Mahavir Singh Phogat and his daughters, Geeta Phogat and Babita Phogat ,was an experience by itself. Here are a few take aways from this movie.

1) Hardwork : Geeta and Babita ,at a very young age, woke up early, gave up their favourite food items ,adapted to non vegetarian food and worked really hard to attain what they have attained today. This proves that success has no short cut, sheer hardwork it is!!!!

2) Focus: To keep our focus on the things we need to achieve. While growing up I am experiencing a lot of distractions around me .I'm thankful to my parents and teachers who always help me get back to track and pave my way towards achieving my goal.

3) Ego: This is one word to stay away from ,as ego hurts us a lot. Geeta, after joining the national academy ,had filled herself with a lot of ego and looked down at the skills her father had taught her. But with repeated failures ,she realised this and accepted that she was too egoist .Once she let her ego vanish, she was back winning on the international platform !!!

4) I am lucky!!!: Sitting through the movie ,I noticed the environment the girls grew up in and the school they attended. I realised how lucky I was to be growing up with better facilities, great teachers and a wonderful school. Thank you God for your blessings .

5) Equality: My salute to Mahavir Singh Phogat ,who believed in his girls ,trained them and opened doors for greater opportunities into a world which was mostly meant for boys .Even though he was made fun of in the beginning, nothing hampered him with the decision he had made for his girls. The rest was history. The girls made our country proud. Thus, all the above take aways would help me and my friends to achieve what we desire for, irrespective of the gender, social status or the caste and creed we are born into. A true lesson for life!

ADITI RAI, V Sigma

HOW I BALANCE MY STUDIES AND PLAYING CHESS

Balancing Chess and studies is not very tough for me as I got used to it some years after I started playing Chess. Mostly I have tournaments for 4-5 days, after which I usually complete my work rather easily and smoothly. But before I go for the longer tournaments, mostly out of state, I find it little difficult to keep my Chess practice going on as well as the school studies. Recently, the NSO exam was just around the corner and I had a lot of school work as well as my Chess practice! Unfortunately, I had to give up some of my tournaments to manage all the school work, NSO practice, and my Chess practice and classes. First when I found out that the NSO exam was on the date of my FA3 exam, to be honest, I kind of freaked out for some time! But after a few minutes I told myself that I have managed many situations like this, for example, the time when I went to South Africa for my World Youth Championship. I actually managed to complete my NSO workbook and some additional practice books 5 days before the exam. Then I studied my notes for the FA3 exam and in my free time I practiced my Chess. I think I did well in the exam, even though there was a lot of load on me! In a similar case last year, during the preparation time for the IEO exam, I didn't have any time to even complete 4 chapters in the IEO textbook! After the exam I didn't know how I scored, but at the same time, it felt like I should have done good. And guess what? I got a bronze at the international level! Actually I didn't have much pressure for all these years as the portion was very less (as compared to higher classes). It might seem that I don't get any leisure time for myself even though I do. In the evening I go down in my building complex to play with my friends and get some exercise after sitting in the house for so long. I even have a cupboard full of interesting books, and I have read most of the books in there! I usually spend 2-3 hours daily in front of my computer practicing chess puzzles or playing chess games. When my coach takes a class, for mostly 2 hours, I reduce my time of self practice so that I can get time to do my homework or to study my class notes. I try to divide my time equally for everything and then again, playing on ground should not be left out! Actually that's how I balance my chess and school studies, and enjoy it too.

VALLABH KAVI, 5th Omega

THE STORY

Once there was a naughty and mischievous rabbit. His name was Champi. Champi lived in a village with his parents. He had no brothers or sisters and his parents always fulfilled his wishes. He never listened to his parents and had started telling lies. One day he thought of doing some naughty and funny thing. He told his mother "I am going out to play for one hour." ("that was totally a lie", he thought to himself). Instead of going out to play with his friends he went out to someone's garden nearby. Over there he saw a shrub full of strawberries.

"Wow!", he thought excitedly, "So many red delicious strawberries!". He could not stop himself from eating them. So, he picked some and gobbled them up. Just at that moment the gardener came. The gardener shouted at him and chased him away. He escaped from the gardener but lost his way to his home. Now it was dark and he was scared.

He prayed to God, "I will not do like this again. Please help me reach home safely". At home it was a very bad scene as his parents were waiting for him angrily and impatiently. After waiting for 4 hours, they started to lose hope of their child coming back home.

When he finally reached back home safely, he thanked god for saving his life, but was scared of his parents that they would scold him, as he was very late . When his parents saw him they gave him a tight hug which was full of love and as comforting as a blanket. Champi told his parents that he was starving and wanted to eat food and would tell all about what happened after having his food. His parents agreed and waited impatiently . After eating he told the whole story to them. Although his parents scolded him, he was happy just because he reached home safely. He promised his parents that he would never tell a lie again and won't be naughty. He had learnt his lesson.

Moral : If one lies one gets into trouble.

PARTH MITTAL, 5th Gamma

A LITTLE BLACK CAT

*There Was A Little Black Cat,
Who Was Eating A Bat,
Then He Became Really Fat,
And Then He Played With A Ball And Bat.*

*I Threw The Cat,
It Fell Where Mr. Strange Sat,
He Really Recognised That,
And Finally Killed The Cat,
As He Was Beaten By A Bat.*

*I Took The Cat,
Who Used To Chat,
He Vomited On My Mat,
I Couldn't Bare That.*

पैदल

डांस यानि नृत्य मधुमक्खियों की भाषा है।

इससे एक मधुमक्खी अन्य मधुमक्खियों को सूचना देती है कि उन पौधों की जगह कहाँ हैं, जिनमें कर्मचारी मधुमक्खियों ने भोजन खोज निकाला है।

फूल का रस चूसने के लिए मधुमक्खियाँ नृत्य करते हुए 3 किलोमीटर तक की दूरी तय कर लेती हैं।
